

Disposable Radiopaque Bulldog Clamps

Sterile, single-use vascular bulldog clamps designed for temporary vessel occlusion during cardiovascular, vascular, and microvascular procedures.

Our disposable bulldog clamps provide secure blood flow control through a soft, atraumatic jaw, supporting controlled vessel occlusion during delicate procedures.

ProClamps are engineered with precision and attention to detail, delivering calibrated clamping force and stability - minimising the risk of slippage or accidental detachment.

As an alternative to standard stainless-steel bulldog clamps, ProClamp features a cushioned jaw interface that distributes pressure more evenly, helping reduce intimal injury, vessel spasm, and jaw imprinting associated with metal jaw concentration.

CALIBRATED CLAMPING RANGE

Available in multiple sizes and calibrated clamping pressures to suit different surgical requirements:

Size	Code	Colour	Clamp Type	Jaw Type	Clamp Force	Comparator
Small	DL1040	●	Straight	Soft-Padded	10g-15g	1001-552
	DL1042	●	Angled	Soft-Padded	10g-15g	1001-553
	DS1040	●	Straight	Serrated	20g-25g	1001-502
	DL1043	●	Angled	Soft-Padded	20g-25g	1001-571
Medium	DL1030	●	Straight	Soft-Padded	25g-30g	1001-550
	DL1031	●	Straight	Soft-Padded	75g-80g	1001-572
	DL1032	●	Angled	Soft-Padded	25g-30g	1001-551
Large	DL1020	●	Straight	Soft-Padded	50g-60g	1001-554
	DL1022	●	Angled	Soft-Padded	50g-60g	1001-555

Multiple force options allow appropriate selection based on vessel size and procedural need.

All products are produced in accordance with and supported by ISO 13485 certification.

Designed to integrate seamlessly into existing surgical technique and workflow.

KEY BENEFITS

- 1 Single-use functionality
- 2 Supplied sterile and ready for use
- 3 Radiopaque for visibility under imaging when required
- 4 Eliminates reprocessing
- 5 Reduces cross-contamination risk
- 6 Consistent performance every case

LOCALLY MANUFACTURED

ProClamp is manufactured by Cobra Biomedical, the manufacturing arm of Kingfisher Medical.

- Direct manufacturing oversight
- Responsive production capability
- Reliable local stock
- Stable pricing
- Short lead times

Supporting supply certainty while strengthening South African medical manufacturing.
