

Medicon Surgical Instruments for Neuro & Spinal Surgery

Trusted by surgeons worldwide.

German craftsmanship

For more than 80 years, Medicon has manufactured high-quality surgical instruments in Germany, supporting neurosurgery and spinal procedures globally.

Their instruments are recognised for precision, durability, and reliable performance.

PROCEDURES

Designed for the full spectrum of neuro and spinal surgery:

Cervical spine surgery

Decompression procedures

Thoracic spine surgery

Fusion procedures

Lumbar spine surgery

Neurosurgical interventions

Built for theatre

- controlled bone removal
- clear visualisation and access
- stable instrument handling
- consistent performance throughout the procedure

Instrument design plays a critical role in achieving these outcomes.

SELECTED INSTRUMENT HIGHLIGHTS

A wide portfolio of instruments is used across neuro and spinal surgery. Below are examples of commonly used instrument types within the range.

Kerrison Rongeurs

Used for precise bone removal during decompression procedures, particularly in confined surgical spaces.

- controlled, fine “bite” action
- suitable for delicate decompression work
- available in multiple sizes and angles

Bone Rongeurs

Used for general bone removal and shaping in spinal and neurosurgical procedures.

- strong cutting performance
- controlled handling
- durable construction

Curettes

Used for tissue and bone removal in confined surgical areas.

- controlled scraping
- available in multiple sizes
- suitable for delicate work

Retractors

Used to maintain exposure and access during spinal procedures.

- stable retraction
- clear surgical field
- reduced tissue interference

Forceps

Used for tissue handling and manipulation during procedures.

- secure grip
- controlled handling
- reliable performance

Micro Scissors

Used for precise soft tissue dissection in microsurgical and neuro procedures.

- fine, controlled cutting
- suitable for delicate microsurgical work
- designed for precision in confined surgical fields

Explore the full range

Thousands of surgical instruments are available across multiple surgical specialties. Our team would be happy to walk you through the full catalogue and identify instruments suited to your surgical practice.
