

Medicon Surgical Instruments

for Plastic & Reconstructive Surgery

Trusted by surgeons worldwide

GERMAN CRAFTSMANSHIP

For more than 80 years, Medicon has manufactured high-quality surgical instruments in Germany, supporting surgeons across plastic surgery, cranio-maxillofacial surgery, ENT, neurosurgery, microsurgery, and more.

Medicon instruments are valued for their balance, durability, and consistent performance in the operating theatre.

DESIGNED FOR PLASTIC & RECONSTRUCTIVE SURGERY

The Medicon plastic surgery portfolio covers a wide range of procedures and surgical applications:

Facial plastic surgery	Rhinoplasty	Microsurgery
Reconstructive procedures	Hand surgery	Soft-tissue surgery

From delicate tissue handling to accurate suturing, the range is designed for surgeons who require dependable instruments throughout every stage of a procedure.

SELECTED INSTRUMENT HIGHLIGHTS

A wide portfolio of instruments is used across plastic and reconstructive surgery. Below are examples of commonly used instrument types within the range.

Supercut Scissors

Supercut technology combines a razor-sharp cutting edge with a micro-serrated opposing blade to improve grip on tissue during dissection.

- Clean and controlled cutting
- Improved grip on tissue
- Durable cutting performance

Delicate Tissue Forceps

Fine-tip forceps designed for atraumatic tissue handling during delicate procedures.

- Refined tip alignment
- Secure tissue grip
- Balanced handling

Needle Holders

A range of needle holders designed to provide secure needle control during suturing.

- Reliable needle grip
- Ergonomic handling
- Durable jaw construction

Rhinoplasty Instruments

A selection of specialised instruments used in rhinoplasty and nasal reconstruction, including designs such as: Cottle, Converse, Masing and Littler.

These instruments support the delicate work required in nasal procedures.

Specialised Retractors

Designed for precise, gentle tissue retraction and improved exposure in delicate procedures, particularly blepharoplasty.

- Helps maintain clear visibility and access within confined surgical fields
- Supports atraumatic soft tissue retraction during fine procedures
- Ideal for use where controlled exposure and delicate handling are essential

SELECTED INSTRUMENT HIGHLIGHTS

A wide portfolio of instruments is used across plastic and reconstructive surgery. Below are examples of commonly used instrument types within the range.

Liposuction Cannulas

Designed for controlled aspiration and infiltration during liposuction procedures.

- Available in straight and angled profiles for procedural flexibility
- Supports controlled aspiration and tissue access
- Suitable for use in liposuction and aesthetic body contouring procedures

Tissue Spreader

Designed for gentle, atraumatic soft tissue mobilisation during plastic and reconstructive procedures.

- Supports controlled blunt tissue spreading
- Helps enable gentler soft tissue handling

Markers

Designed for precise pre-operative skin marking to support accurate incision planning and surgical preparation.

- Supports clear, controlled marking of incision lines before surgery
- Helps improve planning, orientation and procedural consistency
- Suitable for use where accurate skin marking is essential in delicate procedures

Dissecting Scissors

Designed for controlled soft tissue dissection and preparation across delicate surgical procedures.

- Supports precise tissue dissection and preparation
- Enables controlled cutting in fine soft tissue planes
- Suitable for procedures requiring accurate, gentle tissue handling

Plastic Surgery Retractors

Fine retractors designed to maintain surgical exposure while minimising tissue trauma.

KEY INSTRUMENTS & SPECIFICATIONS

Selected product references with key sizes, variants and ordering codes.

Adson "HM"

Delicate Forceps, Dressing & Tissue

Available size: 12 cm / 4¾"

Code: 06.21.62

Castroviejo "HM"

Micro Needle Holders

Available sizes: 14 cm / 5½" 17 cm / 6¾" 14 cm / 5½" 17 cm / 6¾"

Codes: 11.62.64 11.62.67 11.62.84 11.62.87

Crile-Wood "HM" (DeBakey "HM")

Needle Holders

Available sizes: 15 cm / 6" 18 cm / 7⅞" 20 cm / 8"
23 cm / 9" 25 cm / 10" 30 cm / 11¾"

Codes: 10.20.65 10.20.68 10.20.70
10.20.73 10.20.75 10.20.80

Solz

Dissecting Scissors

Available sizes: 20 cm / 8" 20 cm / 8" 15 cm / 6"

Codes: 204.79.20 214.79.20 214.79.15

Variant: Supercut

Gillies

Skin Hooks

Available sizes: 19 cm – 7½" 19 cm – 7½"

Codes: 20.30.19 20.30.20

KEY INSTRUMENTS & SPECIFICATIONS

Selected product references with key sizes, variants and ordering codes.

Mayo-Stille

Dissecting Scissors

Available size:	15 cm / 6"	17 cm / 6¾"
Standard	03.57.15	03.57.17
Supercut	203.57.15	203.57.17
Black Line	213.57.15	213.57.17
"HM"	03.57.65	03.57.67
Supercut Plus	203.57.65	203.57.67
Magic Cut	223.57.65	223.57.67

Stevens, standard

Delicate Dissecting Scissors

Available size:	13 cm / 5½"	12 cm / 4¾" (straight)	12 cm / 4¾" (curved)
Standard	04.67.13	02.40.12	02.41.12
Supercut	204.67.13	202.40.12	202.41.12
Black Line	214.67.13	212.40.12	212.41.12
