

OCULOPLASTIC SOLUTIONS

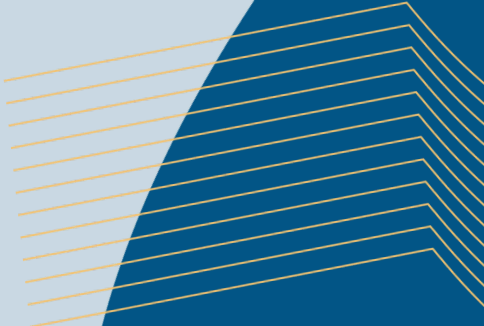

Every implant we provide is a step toward healing - not just physically, but emotionally too. For patients who have experienced trauma, congenital conditions, or surgical interventions, our implants offer more than reconstruction - they offer restoration.

- Orbital Floor Repair
- Enucleation Surgery
- Evisceration Surgery
- Paralytic Ectropion
- Brow Lift
- Orbital Tumor Removal
- Bony Orbit Repair
- Enophthalmos Correction
- Cosmetic Surgery
- And more

Upgrade your results.
Let's book your first Su-Por case.

Su-Por® implants are manufactured by Poriferous and are exclusively distributed in South Africa by Kingfisher Medical.

SU·POR®

A BETTER SOLUTION

Immediate repair with exceptional cosmetic and reconstructive results

Long-term stability and infection resistance

Designed to be easily modified to meet the needs of the patient

Implants

Sphere

- Fully porous for tissue integration
- Extraocular muscles may be sutured directly to sphere without a wrap

Inferior Orbital Rim

- Provides anterior projection
- Designed to be trimmed based on patient needs

Cor-Tec™ Sphere

- Restores volume of orbit following enucleation & evisceration procedures
- Nonporous sphere with smoother outer shell

3D Orbital Floor

- For use during orbital floor repair
- Off-the-shelf anatomic design based on CT scan data

Lower Eyelid Implant

- Assists in management of patients with symptomatic paralytic ectropion
- Available option with strip to provide additional support

Flor-Tec™ Orbital Floor

- Non-integrating implant with thin anterior porous strip
- Porous strip placed inside the orbit rim stabilises the implant

Fan Plate W/ Template

- For medium to large orbital floor defects
- Available with or without nonporous membrane layer

AIRO™ Implant

- Acts to lift and fill the eyebrow
- Composite microchannel-suture brow suspension implant

Enophthalmos Wedge

- Mimics the shape and contour of the orbital floor
- Restores the volume and shape of the orbit
